Locating and Clamping Shanks:

The PinLock™ system is designed to reduce time spent accurately positioning and clamping fixture plates and subplates. A system requires a minimum of two PinLock™ locators, a primary and a secondary locator. Or two primary bushings can be used to achieve higher accuracy. Liner bushings are used to reduce wear on fixture plates. Receiver bushings are used with the PinLock for locating and clamping. For larger subplates additional PinLocks may be used where higher holding force is required. Additional clearance is required on these PinLocks so as not to influence the primary and secondary locators.

Features

- Extraction assist for side load conditions.
- Pins provide stronger holding forces.
- Compatible with existing systems.
- Material : Shank/Bushing, high strength alloy steel
- Finish: Black Oxide
- Heat Treat: Shanks, RC 46-50
Bushings, RC 46-50
Liners, RC 46-50
Pins, RC 56-60
- Operating Temperature Range
-49° to 400°F
- Patent Pending

PinLock pin assembly engages and creates a locking force with line contact as opposed to other competitive systems that use point contact

PinLock features a helical extraction design. This feature aids in overcoming binding in side load conditions and enhances the removal of the PinLock in any application.

Back Mount

Face Mount

Back Mount and Face Mount styles of receiver bushings are available. Generally, the Face Mount receiver bushing is utilized in blind hole applications (Slip Fit). The Back Mount receiver bushing is used in applications for through hole (Light Press Fit).

Drill & Tap Per Design Table Listed Below

Max Corner Radius .03

Face Mount Bushing Installation Instructions

Note: Both type of bushings should be installed approximately 0.012" below subplate surface.

Liner Bushings

Determining if one primary and one secondary or two primary liners are needed will depend on the locating repeatability. With two primary liners, repeatability of ±.0005" will be maintained if the two holes for receiver bushings are held to a centerline distance of ±.0002" tolerance.

NOTE ON INSTALLATION OF PRESS FIT LINERS & BACK MOUNT STYLE RECEIVER BUSHINGS:

To alleviate the possibility of binding the shank in the bore, the maximum interference fit between bore bushing O.D. should not exceed 0.0005".

PLHT2 PinLock hex tool
Fold up hex key set for all 20-50mm PinLock Clamping Assemblies

Model: MX350

- Kurt AngLock Design pulls the part down.
- Pull Type feature decreases stationary deflection.
- 0.625" stroke – Allows for wider range of clamping before having to change setup.
- Modular Design – Mounts on two inch grid patterns when removed from the riser and "T" slots or center hole grids 100mm and under.
- When mounted in a two inch grid the vise comes with locator bolts for quick alignment.
- When mounted on the risers, precision 5/8 holes have been added so Kurt sine keys can be used for quick alignment.
- Auxillary clamping slots – allows the customer more flexibility in mounting the vise.
- The customer will finish machine the horizontal surface of the jaw plate for higher accuracy, eliminating the need for parallels
- Optional jaws:
 - Double step 40 RC jaws with CDN coating on the vertical position of the step Part No. MX350-236-1
 - Machinable semi-hard steel jaws available in 3 lengths
- Chip guard – the fully chip guarded design allows for faster load times and a smoother operating vise.
- The screw is easily manufactured and changed, by the customer, to allow a broad range of part sizes.
- Kurt workstop is an available option (Part No. 6AWS-Kit)
- Maximum of 40 Ft. Lbs. provides up to 7,000 Lbs. clamping force
- Ship Weight: 31lbs.

Screw Selection Chart

FASTER SETUPS FOR VISES & TOWERS

HD and HDL vises and towers have new quick change jaw feature and fewer components for faster changeovers.

With a half turn of a hex key, the stationary jaw lifts off the vise or tower body. The jaw resets and self-aligns quickly without special tools. Spring pre-load design insures fast, easy loading of parts.

MORE OPTIONS

Fixture Plate (HD6ALP620-239)

Ultra high density loads of small parts can be accommodated in a single setup by mounting various off-the-shelf clamping modules to this fixture plate.

To utilize this system's components, the movable and stationary vise jaws are removed and the fixture plate is positioned and then clamped by normal actuation of the vise.

Back-to-back mounting option

HD vises mount easily back-to-back, providing a new way to achieve a multiple clamping station tower. Contact factory for details.

Estimated shipping weight: 88.9Kgs/196Lbs

HDM690 – Metric Version

THE FIRST 6 INCH PULL TYPE VISE WITH A 9 INCH OPENING

KURT Anglock® design combined with pull-type design provides ultimate rigidity and accuracy

Machinable jaws are reversible to provide multiple setups for similar or dissimilar parts.

HD690 Vise Features:

- A full 9 inch opening between jaws when using standard hard jaw plates.
- Less deflection of stationary jaw. Wider more stable stationary jaw equals less deflection.
- Stationary jaw bolts down from top. No need to remove from table to disassemble vise. Bolting the stationary from the top reduces the stress in the body and will stay flatter after assembly.
- Narrower body width allows more vises in the same work envelope.
- Taller body design equals less deflection under clamping loads.
- Bolts and locates directly on standard grid plates: 40mm, 50mm or 2 inch.
- Pull type body design reduces stress in the body resulting in more accurate clamping.
- Quick change movable jaw. The HD platform movable jaw allows for quick change and carvability to hold that odd shaped part.
- GrooveLock® jaw and workstop included.
- Adaptable to hydraulic. Uses sine keys for alignment.
- Swivel base available. Part No. D50-4-SA
- Body height matched ± 0.0005 "
- Ship weight: 75lbs.

The HDL Anglock® Vises are high density long vises with two clamping stations. They provide repeatable clamping to 0.0002" and combine high density with heavy duty features. Designed on a rugged 80,000 PSI ductile iron body with steel components, both models provide strength, rigidity and long term accuracy while absorbing machining vibration.

Features:

- Two clamping stations – repeatable clamping to 0.0002".
- Full 3 and 4 inch opening in each station with standard hard jaw system.
- Jaws are indexable 180 degrees.
- Manual and hydraulic models available.
- Fast easy conversion between manual and hydraulic models.
- Part #HDHLM4-3-SA-KIT (4 inch) & #HDHLM6-3-SA-KIT (6 inch)
- Maximizes the number of parts in the work envelope.
- Adjustable pre-load feature allows you to minimize pre-load range thus reducing the turns of the handle to open or close the vise (manual version).
- Holding block features the ability to clamp same or dissimilar sized parts and provides pre-loading ability in the front or back jaw (manual version).
- Lifetime Iron Clad Warranty.
- Bed height tolerance $\pm 0.001"$

Model: HDM6 Manual

For specific model numbers see page 21.

The HD CarvLock Vises are High-Density and Heavy-Duty. The overall vise is very compact, making possible maximum density workholding across the full range of today's machining centers. The HD Vise can be equipped with quick change jaws in aluminum, cast iron or with a fixture plate.

Features:

- Compact size. Overall length of just 13.750" and overall width of only 6".
- Clamping power/accuracy - produces up to 7,800 lbs of clamping force with repeatable clamping to 0.0002".
- Durability - 80,000 PSI ductile iron vise body for rugged strength, rigidity and long-term accuracy while absorbing machining vibration.
- Enclosed vise body keeps out chips and contaminants - makes cleanup fast and easy.
- Fast, easy conversion from manual to hydraulic. Easy to switch between both styles. Part No. HDHM6-3-SA-KIT.
- Jaws are indexable 180 degrees.
- Lifetime Iron Clad Warranty.

The HDM6 Manual vise body has optional jaw systems which include a set of 7075 T-6 aluminum jaw blocks or a set of ductile iron jaw blocks (1.73" standard thickness, 2.40" optional thickness) or fixture plate. Screw and nut assemblies are reversible with the vise body. One jaw kit will handle two different parts.

(shown with optional machinable aluminum jaws)

(shown with optional machinable aluminum jaws)

Model: HDHM6-DA Double Acting Hydraulic

Double acting hydraulic vise uses hydraulic pressure to clamp and unclamp. Extremely reliable operation compared to other vises using mechanical operation for unclamping. Designed for automated systems.

Features:

- Well suited for automation.
- Fast, positive open/close cycle.
- Compact size - overall length of just 13.750" and overall width of only 6".
- Clamping power/accuracy - produces up to 7,800 lbs clamping force @ 5,000 PSI of hydraulic pressure with repeatable clamping to 0.0002".
- Durability - 80,000 PSI ductile iron vise body for rugged strength, rigidity and long-term accuracy while absorbing machining vibration.
- Enclosed vise body keeps out chips and contaminants - makes cleanup fast and easy.
- Jaws are indexable 180 degrees.
- Lifetime Iron Clad Warranty.

The HDHM6 Hydraulic vise body has optional jaw systems which include a set of 7075 T-6 aluminum jaw blocks or a set of ductile iron jaw blocks (1.73" standard thickness, 2.40" optional thickness) or fixture plate. Screw and nut assemblies are reversible with the vise body. One jaw kit will handle two different parts.

Manually or Hydraulically operated, eight station HDL Cluster Tower system features a ductile iron integral vise tower. Designed for use on mid-size and larger machining centers including horizontal and vertical machining centers with a fourth axis and indexable tables. This workholding system achieves workpiece immobility while damping cutter induced vibration.

Features:

- High density vise tower system. Hold multiple parts in eight clamping stations. Increase part volume.
- Repeatable clamping to 0.0002". 4 inch model delivers up to 5,870 lbs. each station at 60 ft lbs of torque. 6 inch model delivers up to 7,460 lbs. of clamping force at 70 ft lbs of torque.
- Self-adjusting holding block of either front or back jaw for clamping the same or dissimilar sized parts. To further enhance fast operation, an adjustable pre-load feature reduces handle turns for opening and closing clamping stations.
- Ductile iron column insures strength, rigidity and long term accuracy.
- Jaw options available to fit your application. Select from Hard jaws, Machinable aluminum jaws, Machinable ductile Iron jaws. See page 25.
- Jaws are indexable 180 degrees.
- Aluminum fixture plate available. See page 24.
- Elevated column makes clearing chips and contaminants fast and easy.
- Lifetime Iron Clad Warranty.

Model: CTHDM64

For specific model numbers see page 21.

This manually operated, eight station HD Cluster Tower system features a cast iron integral vise tower. Ideal for horizontal machining centers or vertical machining centers with indexable tables. This workholding system achieves workpiece immobility while damping cutter induced vibration.

Features:

- Most compact, high density vise tower system in the industry.
- Hold multiple parts in eight clamping stations. Increase part volume.
- Small footprint which reduces spindle travel, part to part, maximizing throughput without compromising holding accuracy.
- Ductile iron column insures strength, rigidity and long term accuracy.
- Jaw options available to fit your application. Select from Machinable aluminum jaws, Machinable ductile Iron jaws and Aluminum fixture plate.
- Jaws are indexable 180 degrees.
- Base sizes available include: 300mm, 400mm, 500mm, 630mm.
- Elevated column makes clearing chips and contaminants fast and easy.
- Can be converted to hydraulic actuation.
- Lifetime Iron Clad Warranty.

(shown with optional machinable aluminum jaws)

Model: CTHDHM64

For specific model numbers see page 21.

Identical in capacity and features as the manual HD CarvLock Tower system, this system is actuated hydraulically. Hydraulic piston is an integral part of the vise nut within the vise and tower body to conserve valuable space on the machine table. This hydraulic version also shares all of the jaw options and other accessories which are available in the manual version. This hydraulic system has the added advantage of converting easily in minutes to manual operation by swapping out internal components. Hydraulic pump and hose not included.

Features:

- Up to 7,100 pounds of clamping force.
- Jaw options available to fit your application. Select from Machinable aluminum jaws, Machinable ductile Iron jaws and Aluminum fixture plate.
- Jaws are indexable 180 degrees.
- Elevated column makes clearing chips and contaminants fast and easy.
- Base sizes available include: 300mm, 400mm, 500mm, 630mm.
- Lifetime Iron Clad Warranty.

(shown with optional machinable aluminum jaws)

HD CARVLOCK® TOWERS

CTHDHL64 Hydraulic Tower – English CTHDHLM64 Hydraulic Tower – Metric

This hydraulically operated eight station tower features all-new design for fast loading of parts. All internalized hydraulic piston/nut saves valuable space. Includes all original KURT Anglock precision clamping and iron clad rigid construction for damping vibration.

Features:

- Hydraulically operated eight station CTHDHL64 ClusterTower.
- Utilizes an all internal hydraulic piston nut to conserve space. Pressure is maintained until released by operator or triggering device. Easy disconnect for pallet shuttle.
- Repeatable clamping to 0.0002". Each station delivers up to 7,100 lbs. of clamping force at 4,500 PSI.
- Each face is controlled separately for convenient part loading and removal.
- Jaw opening is 4" per station.
- Each face has a maximum total stroke of 1/4" (1/8" per station).
- Jaw options available: Hard jaws, machinable aluminum. machinable ductile iron. See pg.25
- Base sizes available: 400mm, 500mm, 630mm.
- Lifetime Iron Clad Warranty

(shown with optional hard jaws)

KURT ROTARY TABLE WORKHOLDING SYSTEMS

Features:

- High density vise tower system. Hold multiple parts in eight clamping stations. Increase part volume.
- Repeatable clamping to 0.0002". Each station delivers up to 7,460 lbs. of clamping force at 70 ft lbs of torque.
- Self-adjusting holding block of either front or back jaw for clamping the same or dissimilar sized parts. To further enhance fast operation, an adjustable pre-load feature reduces handle turns for opening and closing clamping stations.
- Ductile iron column insures strength, rigidity and long term accuracy.
- Jaw options available to fit your application. Select from hard jaws, machinable aluminum jaws, machinable ductile iron jaws and aluminum fixture plate.
- Jaws are indexable 180 degrees.
- Lifetime Iron Clad Warranty.
- Optional single-station convertible kit available for machinable jaws (CTHDL4M-CONVKIT) and hard jaws (CTHDL4J-CONVKIT).

What comes with the kit:

- Four-sided column with jaw kits
- End Support Assembly
- Indexer Locator
- T-Nuts
- Face Plate
- Locating Pin
- Screws

*Sub-plates not included.
Can be quoted separately.

Add this tower to your indexer or have Kurt provide a turnkey solution.

Kits are available for the following models:

HARDINGE
GD160
GD210

Available jaw and fixture options:

- Aluminum, cast iron, steel, and fixture plate.
- See pages 22-25

HDLM6J (Manual 6" vise with hard jaws.)
HDLHM6AL2.5 (Hydraulic vise with optional height aluminum jaws.)

HDL Double Station Vise Examples:

HDM6AL (Manual 6" vise with standard aluminum jaws.)
HDM6AL2.5 (Hydraulic vise with optional height aluminum jaws.)

HD Double Station Vise Examples:

CTHDM643AL (Manual 6" tower with 4 sides, 300mm base with standard height aluminum jaws.)
CTHDM645AL2.5 (Hydraulic 6" tower with 4 sides, 500mm base with optional height aluminum jaws.)

HD and HDL ClusterTower Examples:

Note: Hard Jaws for HDL bodies only

THDM63AL (Manual 6" back-to-back vise, 300mm base with standard height aluminum jaws.)
THDM66AL2.5 (Hydraulic 6" back-to-back vise, 630mm base with optional height aluminum jaws.)

HD Back-To-Back Visers Examples:

Back-to-back mounting option.

HD vises mount easily back-to-back, providing a new way to achieve a multiple clamping station tower. Contact factory for details.
Estimated shipping weight: 88.9Kgs/196Lbs

Fixture Plate (HD6ALP620-239) For HD Short Body

Ultra high density loads of small parts can be accommodated in a single setup by mounting various off-the-shelf clamping station modules to this fixture plate.

To utilize this system's components, the movable and stationary vise jaws are removed and the fixture plate is positioned and then clamped by normal actuation of the vise.

HD Vise design utilizes fewer working components. Faster changeovers. Fewer problems.

PATENTED

Models:
DL800

Model:
DLH800

DL800 Features:

- Large Capacity
-DL800 8" wide x 6" opening each station.
- Productivity – multiple part workholding for better spindle utilization, reduced tool change time, and reduced machine travel from part to part.
- Accuracy – repeatable clamping to 0.0002".
- Durability – 80,000-PSI ductile iron body and steel components provide strength, rigidity and long term accuracy while absorbing machining vibration.
- Self-adjusting holding block over the entire clamping range.
- Metric version available.
- Optional internal hex screw available.
- Pre-load is adjustable from 0.010" to 0.150".
- New holding block features the ability to clamp dissimilar sized parts and provides preloading ability in the front or back jaw.

Shown with optional convertible kit.

Use your DoubleLock vise to it's full capacity with the DoubleLock convertible kit. The kit is available for the DL800 vise. DLC800-KIT

OPTIONAL CONVERTIBLE KIT – JAW POSITIONS

OPTIONAL CONVERTIBLE KIT - JAW OPENING POSITIONS

Part #	A	B	C	D	E	F	G	H	Ship Wt. Lbs

DLH800 Features:

- Repeatable clamping (0.002") for high accuracy machining and handles a higher horsepower cut than the manual version.
- Compact design features a wide range of clamping forces up to 12,600 lbs. 1/4" stroke - 1/8" per side.
- Productivity – multiple part workholding for better spindle utilization, reduced tool change time, and reduced machine travel from part to part.
- Durability – 80,000-PSI ductile iron body and steel components provide strength, rigidity and long term accuracy while absorbing machining vibration.

Intensifier, APD50-112, available in either hand (APD50-112-Hand) or foot (APD50-112-Foot) option. Each vise must have it's own intensifier.

Model:
CT2DC4B

Features:

- Made from ductile iron and steel, a stiffness of 2.5 times aluminum is achieved. Vibration damping of ductile iron is 20 times higher than aluminum. Includes hardened bed and jaws.
- Four double vises with 50mm (1.968") wide jaw and 50mm (2") opening.
- Pilot (0.8768") in both ends. Four and six bolt mounting hole pattern fits all indexers. Has 60° center in outboard end.
- Convertible to single station large opening vise.
- Conversion kit included.
- Options include machinable jaws, tail support, workstops.
- Chip guards included.
- 45 lbs.

ClusterLock is a precision double vise, configured from 1 to 10 units in a common base. By using the famous AngLock principle assures that the movable jaw will not lift.

Features:

- 80,000-PSI ductile iron construction.
- Hardened bed ways and hardened steel jaw plates.
- Standard spacing is 1.968" (50mm). Consult the factory for other spacing.
- Vise bed surface is ground parallel to within 0.001".
- Ideal for small VMC's with pallet changers.
- Suitable for tombstone mounting on HMC's.
- Can be converted to single opening (6" maximum) with the optional convertible kit.

SeraLock Tower Options

The SeraLock Towers, SeraLock Pallets, WedgeLock Module system and MoveLock Modular System are the latest innovation for achieving high density, highly repeatable part clamping.

SeraLock Towers and SeraLock Pallets are designed with interlocking "V" shaped serrated surfaces for precise and repeatable alignment of WedgeLock and MoveLock clamping modules.

SeraLock Towers are available in four sided, two sided and single sided towers with a base that will mount to your HMC or an indexer for VMC applications. SeraLock pallets are available in sizes that will accommodate most vertical machining centers. A custom, high density workholding system can be configured quickly when our WedgeLock modular system of single and double sided clamping jaws are used with the SeraLock Tower or SeraLock Pallet.

SeraLock features:

- Self-aligning.
- Multiple components may be used at the same time.
- Like and unlike workpieces may be machined all in the same setup.
- Mix and match components.
- Allows creation of the equivalent of a custom fixture in less time than the custom fixture can be designed.
- Modular components can be used over and over again.
- Very economical.

WEDGELOCK CLAMPING MODULES

WedgeLock Clamping Options

SINGLE CLAMP WITH STATIONARY JAW

Contains stationary jaw on one side and movable jaw on back side. Provides 5,000 lbs. clamping force at 70 ft. lbs. torque.

SWSC1

DOUBLE CLAMP

Contains two movable jaws. Used with stationary block to become a high density workholding solution. Clamp two parts with one screw. Provides 5,000 lbs. clamping force at 70 ft. lbs. torque.

SWDC1

STATIONARY BLOCK

Used with single or double clamp.

SWSB1

DOUBLE STATIONARY BLOCK

Use when double clamps are used side by side.

SWDSB1

DIVIDER JAW

Use in between movable and stationary jaw when milling several identical parts. Jaw floats to accommodate slight part difference. Allows several parts to be clamped with one movable jaw.

2 Face Modular ToolBlox™

Here's a new lighter weight building block module to add high density and versatility to most model horizontal machining centers. It is over 30% lighter than comparable size tombstones with aluminum sub-plates. Provides a lower cost alternative to dedicated fixtures. Features bolt holes and dowel pattern on each face for fast installation and removal of sub-plates and other workholding components. Class 30 Grey Iron.

4 Face Modular ToolBlox™

This 4 sided tombstone is another lower cost option over dedicated fixtures. It is over 30% lighter than comparable size tombstones with aluminum sub-plates and is designed to reduce setup time. Provides versatility for mounting manual and hydraulic vises and most clamping devices. Standard and custom sub-plates are also available. Class 30 Grey Iron.

Sub-Plates

- Kurt offers a variety of standard ToolBlox sub-plates for your application.
- Please specify A36 HRS or 6061 T6 Aluminum.
- You may specify optional hole patterns and/or keyways.
- All Kurt ToolBlox sub-plates are rotary ground to ± 0.001 " thick.
- All Kurt ToolBlox sub-plates are doweled and bolted to the Kurt Modular ToolBlox allowing the quickest change possible for dedicated fixtures.
- You can permanently mount Kurt vises to the ToolBlox sub-plates for fast, easy set-up changes on milling machines.

VERSATILE LOCK® VISES

Standard (3600) and Short (3620)

PATENTED

Models:
Manual
Hydraulic
Air

3600V
3600VM - (Metric)

3600H - Standard Hydraulic

3600A - Standard Air

The Versatile Lock vise is the industry's ultimate single station CNC vise. It offers ultra-precision function through these important design features: The original, time proven Kurt AngLock design prevents parts from lifting upward under heavy clamping loads. The "pull-type" jaw clamping reduces jaw stationary deflection by at least 80%. The one piece vise body and stationary jaw provide greater strength while reducing weight.

Features:

- Can be mounted upright or on either side.
- Matched stationary jaw to keyway including the body height ± 0.001 ".
- 0.0005" clamping repeatability.
- Footprint on the short version is 13". Ideal for the smallest machines.
- Hydraulic option is available as a complete package including the intensifier (specify foot or hand actuation). (See Page 67). Each vise must have it's own intensifier.
- All air and hydraulic units feature a 1/4" vise stroke.
- Air vise has a precise and repeatable "gentle touch" for delicate parts.
- Optional internal hex available for 3600V only. (3600V-INT).

The 3600V shown mounted "back to back". Makes a fast, easy and economical vise tombstone. Bases can be tailored for most HMC's. See Page 43

VERSATILE LOCK[®] VISES

Reverse (3610) and Short Reverse (3630) PATENTED

Models:
Manual
Hydraulic
Air

3610V

Use the Versatile Lock in this configuration for the added benefit of easier part programming in "Y axis" positive direction. It also reduces the "reach-over" distance making part loading safer and easier for the operator.

Features:

- Can be mounted upright or on either side.
- Matched stationary jaw to the keyway including the body height ± 0.001 ".
- 0.0005" clamping repeatability.
- Footprint on the short version is 13". Ideal for the smallest machines.
- All air and hydraulic units feature a 1/4" vise stroke.
- Air vise has a precise and repeatable "gentle touch" for delicate parts.
- Some models available in metric.

AngLock® PT-SERIES VISES

Manual and Hydraulic

Models:
PT400A
PT800A
PTH400A
PTH800A

The AngLock PT-Series vises offer high precision function through these important design features: The original, time-proven Kurt AngLock design prevents parts from lifting upward under heavy clamping loads. The "pull-type" jaw clamping reduces stationary jaw deflection by at least 80% as the movable jaw is "pulled" into the stationary jaw and not pushed like standard screw type vises.

Features:

- "Pull-type" clamping means high precision and repeatability.
- Up to 20,000 lbs. precision clamping force.
- Can be mounted upright or on either side.
- CNC style allows compact spacing.
- Both sides ground square to within 0.001" with base and top.
- 80,000-PSI ductile iron body.
- Matching of bed height ± 0.001 " available at an additional cost.
- Matching of the keyway to the stationary jaw ± 0.001 " is available at an additional cost.

The PTH800A shown mounted "back to back". Makes fast, easy and economical vise tombstone. Bases can be tailored for most HMC's. See Page 43

CUSTOM ENGINEERED WORKHOLDING

VMC Applications

Kurt brings more than four decades of experience in providing solutions to CNC machine workholding problems and a deep understanding of how workholding integrates into today's productivity and quality driven manufacturing process.

At Kurt, we provide the complete spectrum of workholding solutions with the same dedication that has produced the most successful vises for over 40 years. Our custom engineered workholding engineers have built an industry leading reputation assisting automotive, aerospace and other metalworking intensive industries to improve quality and reduce cycle times. **1 Year Iron Clad Warranty**

Industry: Medical Device

Solution: Custom pallet vise enhances VMC throughput for Device manufacturer.

Application: Hydraulic Industry

Solution: High density fixture clamping four parts per station.

VMC Applications Call for vacuum workholding

Application: Machine Tool Industry

Solution: Second operation grinding fixture feeds productivity into FMS.

Application: Commercial Industry

Solution: Eight station indexing trunnion fixture for high speed machining.

Application: Machine Tool Industry

Solution: Grinding fixture increases holding power and improves accuracy.

Application: Aerospace component

Solution: Rotary table fixtured with a zero-point docking system for repeatability.

Application: Automotive Industry

Solution: Up to three-sided machining using an indexing trunnion fixture.

Application: Aerospace Industry

Solution: High density DoubleLock vise setup holds 18 parts for precision machining.

HMC Applications Call for vacuum workholding

Application: Aerospace Industry

Solution: Two-sided tombstone with six MoveLock clamping stations handle wide range of part sizes.

Application: Machine Tool Industry

Solution: Window fixture for 2 sided machining enhances automated FMS line.

Application: Automotive Industry

Solution: D100 movable and stationary jaws integrated onto a tower.

Application: Hydraulic Industry

Solution: Multiple towers with DoubleLock vises on palletized machining center for 24/7 production.

Application: Hydraulic Industry

Solution: Window hydraulic (AB Load) fixture allows matching on five sides.

Application: Hydraulic Industry

Solution: Kurt serrated Double Station vise towers on palletized machining centers for 24/7 production.

MoveLock MODULAR SYSTEM

PATENTED

**Hydraulic Movable
Jaw MLH35**

**Manual Movable
Jaw ML35**

**Stationary
Jaw MLS351**

This high precision two-piece vise is the first of its type to utilize the famous Kurt Anglock concept to prevent jaw lift during clamping. As power is applied to the piston, it is driven forward to locate on an internal segment. While the lateral force is clamping the part, downward pressure is being applied to the movable jaw, which minimizes or prevents part lift. For every pound of clamping force on the jaw, there is a half pound of force exerted down on the movable jaw.

Features:

- Movable and stationary jaws sold separately.
- Movable jaws are available in either manual or hydraulic actuation.
- May be used as a single or double station vise, and can be mounted side by side.
- Can be configured into high density fixturing. (See Seralock® pages 30-31)
- Features a 5/16" stroke.
- Mounts on a 2" x 2" grid system, T-slot sub-bases with a 2" pitch, standard sub-plates and machine tables and SeraLock system.
- Clamps large workpieces - jaw opening limited only by the work envelope.
- Light weight.
- Small footprint - 3.500" jaw width.

Special jaw plates and workstops are available.
Contact the factory for pricing and availability.

MTM8

Unlike many competitive cam action models, this product employs the same AngLock concept as the world famous Kurt vises. When a quarter turn is applied to the screw, the split clamp jaw is forced both laterally and down, precisely clamping the part and preventing part lift at the same time. In-house tests showed zero lift when the MiniLock was used in several grinding operations.

Features:

- By using stationary blocks or pins, two parts may be clamped by a single MiniLock.
- The versatile MiniLock can be used in single holding, double holding or multiples of both single and double holding applications.
- Ideal for dedicated fixturing as well as for palletizing small parts to be loaded into receivers on machine tables.
- Through the use of a variety of locating blocks, workstops and MiniLocks, several similar parts or a part "family" can be located on a single pallet.
- Clamping jaw made from rugged Ampco 18 aluminum bronze.
- Actuating screw is made from a special alloy steel.
- While one pallet of parts is being machined, the operator can be unloading and loading a second similarly configured pallet away from the machine tool.
- Steps may be machined into the clamp jaw for operations that require parts to be raised above the pallet or machine table.
- The low profile allows for machining of complete top surfaces of parts without having to re-clamp.
- Conveniently uses standard thread sizes and standard hex keys.
- **One MiniLock package contains six MiniLocks.**

Option:

To allow a greater differential between workpieces, it is suggested you create a thread free zone to allow more sideways movement for the screw head.

Important Notice: Full thread is required when MiniLock is used clamping only on one side.

MiniLock before tightening clamp screw

MiniLock after tightening clamp screw

Clamp multiple parts with several MiniLocks and workstops.

Three MiniLocks used to clamp one larger part.

SELF-CENTERING VISE

Models:
SCD430
SCD640

Kurt has two Self-Centering vises, a 4" jaw width (SCD430) and a 6" jaw width (SCD640). Jaw opening on the 4" model is 6.25" and 8" on the 6". Centering accuracy from minimum to maximum opening is 0.0006" with 0.0002" repeatability. Both movable jaws are Anglock design with zero lift. A unique feature is an adjustment that allows the centerline of the jaws to be set. This is especially important when mounting several vises on one machine and all centerlines must match.

Features:

- Lip seals on main screw.
- Chip guards.
- Hardened jaws.
- Hardened bed ways.
- 80,000-PSI ductile iron construction.

EXTRA CAPACITY 6" XL VISES

Hydraulic Reverse Version

Manual Version

Kurt XL vises are designed for precision clamping of very large parts for both tool and die and production CNC applications. With up to a 28.750" jaw opening, these vises lock precisely, even for high horsepower "hogging out" operations. All sides of Kurt XL vises are accurate to within 0.001" for precise, easy alignment in multiples. XL vises may be mounted and used as receivers for other workholding devices.

Features:

- Up to 12,000 lbs. precision clamping force.
- AngLock design reduces jaw lift.
- 80,000-PSI ductile iron body.
- 6" and 8" jaw widths with jaw openings from 0"-21" with a maximum of 28.765" (in the outside jaw positions).
- "Pull-Type" clamping means high precision and repeatability.
- Great for high horsepower "hogging out" applications.
- Reverse model reduces "reach-over" distance making part loading safer and easier for the operator. Also part programming is easier in the "Y" axis positive direction.
- Manual, air and hydraulic models available.
- Air and hydraulic feature a 1/4" stroke.
- Air power option provides a precise and repeatable "gentle touch" for delicate parts.
- Internal hex screw available.

Models:

D40 D688® DM688 D810 D100

The original Kurt Anglock D-Series vises are designed for precision part clamping on basic machine tools such as knee-type mills, grinders and machining centers. D-Series vises are ideal for use in running production parts where datums, flatness and parallelism is important. You can precision bore, tap, drill, grind and finish with high accuracy on most parts made of die cast aluminum, steel, and iron in your Kurt Anglock vises. No other brand can give you the time proven accuracy of the Kurt Anglock vises.

All Kurt vises have a friction reducing, needle bearing, thrust collar. The needle bearing increases jaw clamping pressure.

Features of All D-Series Vises Include:

- AngLock design assures the movable jaw does not lift.
- Hardened vise bed.
- Hardened jaw plates.
- Semi-hard steel screw.
- 80,000-PSI ductile iron body.
- Matching of bed height ± 0.001 " available at an additional cost for the D40 and D100 vises.
- Matching of the keyway to the stationary jaw ± 0.001 " is available at additional cost.

D40

The D40 vise is recommended for intermediate milling and grinding work. It is an ideal vise for use in matched multiples for holding long parts. With jaw plates in their outside positions, this 4" vise has a 10-5/16" capacity.

D688®

DM688 (Metric)

- Large 8.8" (223.520mm) jaw opening.
- Outside rail edges of the body are machined.
- Vise nut does not extend beyond the end of the vise body.
- D688 has the same footprint as the D675 vise. Distance from keyway to stationary same as D675.
- Groove Lock jaw (D60-315) and workstop (WSRL46) standard.
- Patented "O" ring pull down feature standard.
- Approximately a 20% increase in clamping pressure over D675 vise.
- Distinctive patented design of the "Kurt Look".
- Patented AngLock design.
- Bed height matched to size 2.875" (73.025mm) ± 0.0005 ".
- Repeatability within 0.001".
- Sealed needle thrust bearing used at hex end of screw to reduce clamping friction.

AngLock® D-SERIES VISES

D810

Kurt's new D810 features a new updated body style:

- Quick Set-up feature.
- Top down, four bolt design on the stationary jaw reduces vise deflection by 25 percent while allowing total disassembly of the vise without removing the body from the machine table. Special brush seals shield and protect vise screw threads from machined chips and residue.

- The nut has been shortened so as not to protrude past the end of the vise body. New powder coat paint finish resists coolant-induced peeling for greater corrosion protection. The overall vise footprint is identical to earlier models so both can be used interchangeably and in tandem.
- With a jaw opening of 10" and clamping force up to 11,600 lbs., the D810 vise locks parts precisely including very large parts for aggressive "hogging out" operations.

D100

The D100 is the largest and strongest of our general purpose vises. With 9-3/4" of jaw opening, it has the capacity and strength to take on your highest horsepower milling cuts. It's the most precise and rugged 10" production vise in the world.

3-IN-ONE SYSTEM JAW PLATES

Model: KSJ6

Features:

- Ideal for quick setups of common angle cuts.
- Preset patterns in jaws provide for these 7 popular angles: 5°, 10°, 15°, 20°, 25°, 30°, 45°.
- Tolerance between holes 0.0004" (0.01mm)
- Jaw dimensions:
6" x 1.735" x 0.725" ± 0.000787 " (± 0.02 mm)
- Pins Sets Included are:
 - 4 ea 6mm x 22mm • 3 ea 6mm x 40mm
 - 3 ea 6mm x 58mm • 3 ea 6mm x 76mm
- Pin Sets Dimensional Tolerance: ± 0.0007 " (0.018mm)
- Doubles as a convenient workstop, Triples as a parallel.
- Does the work of 3 products.
- Made for Kurt in Sweden.
- Ship weight: 3.45lbs

Grid Plates

TP101602 10" x 16"

TP122002 12" x 20"

TP162602 16" x 26"

Grid Plates (also known as locator plates, tooling plates) – customizable grid patterned locator system.

Purchase standard grid plates to self customize or purchase a plate customized to your machine tool table for hold down holes, locator pins, standard dowel pins, keyway holes or slots as required. Call for quote on custom plates.

A36 Steel plates are stress relieved and ground with a treated black oxide surface.

Features:

- Available in a variety of sizes (inch dimensions).
- Laser cut alpha/numeric indicator strips can be added/removed to adjust to needed size.
- Reduce set-up time.
- Multipurpose bushed and tapped holes held to true position 0.0008".
- Protection plugs included for every hole.
- Kurt HD and MoveLock vises can be mounted directly.
- 2" center to center spacing.

In-stock standard plates ship next day.
Customized plates ship within 5 days or less after receipt of all specifications.

Each plate comes with one alpha and one numeric strip, multipurpose bushed and tapped holes, protection plugs, and four locator holes. Mounting brackets sold separately.

TP101602

With the InnerLock jaw plates, it takes only 40 seconds to change. By minimizing down time, the unique reversible feature saves you money on the jaw plates. Each jaw plate can be mounted in two directions, giving you two jaw plates for the price of one. For instance, the plain jaw plate when in the inverted position has a step for holding small parts closer to the spindle. Our small through-hole design allows for greater gripping surface.

6PJS Magnetic Jaw Plate and Parallel Set (Imported)

This 6" magnetic jaw set from Kurt comes complete with two jaw plates with an embedded rare earth magnet for holding the parallels in place, leaving hands free to hold and clamp the workpiece. Genuine Kurt Groove Lock workstops are also included, all in it's own convenient plastic storage box. PATENTED

This 11 Piece Set Includes:

- 2 ea. 3/16" x 1" x 6" ground steel parallels.
- 2 ea. 3/16" x 1-1/4" X 6" ground steel parallels.
- 2 ea. 3/16" x 1-1/2" x 6" ground steel parallels.
- 1 ea. D60-7-SAMAG hardened jaw plate with rare earth magnet.
- 1 ea. D60-315-SAMAG hardened Groove Lock jaw plate with rare earth magnet.
- 1 ea. WSRL46 Kurt Groove Lock workstop.
- 1 ea. WSRL46 Kurt Groove Lock extended workstop.
- 1 ea. plastic storage box.

Features:

- Fits all Kurt 6" vises.
- Powerful rare earth magnets hold the parallels in place securely.
- Genuine Kurt Groove Lock workstops are included.
- Storage box helps keep you organized.
- Ground steel jaw plates and parallels.
- 8 lbs.

6" Magnetic Jaw Plates

2MWS Magnetic Workstop

Features:

- Fast, accurate positioning of parts.
- Rare earth magnet attaches anywhere on the workholding setup without the need for connecting bolts or screws.
- Removes quickly to clear spindle travel when necessary.
- 18lbs of pull.
- Body is 2 5/8" long with 2" adjustable stop pins on both ends of body.
- Ideal for single, multiple station vises and high density workholding setups.

AngLock® Workstop

Versatile, quick mounting workstops will work above jaws when gang mounting vises and space for a workstop does not exist. These Kurt workstops permit fast, accurate positioning on repetitive work. They team up with your AngLock precision vise for accurate parts production.

ANGLOCK VISE WORKSTOPS		
Part #	Vise Size	Weight
D30-45	4" Vise	1 Lb.
360PWS	6" Vise	2 Lbs.
D80WS	8" Vise	4 Lbs.

6AWS Workstop

New adjustable workstop can be used on all Kurt high-density vises. The body clamp has a 2" adjustment and features a 3" long stop pin for fast and easy set-ups. A long and short spacer is also available to fit almost any application.

Features:

- Versatile.
- Economical.
- Fast, easy set-up.
- Black oxide finish.
- Fast accurate positioning of parts.

WORKSTOPS	
English Vise 5/16-18	Metric Vise m8 x 1.25
6AWS-Kit	6AWSM-Kit
6AWS Workstop	6AWSM Workstop
6AWS-288 1" Short Spacer	6AWSM-288 25.4mm Short Spacer
6AWS-289 2" Long Spacer	6AWSM-289 50.8mm Long Spacer

Kits include the workstop and both long and short spacers.

Parallel Keeper

Models: KPS-6000 KPS-8000

Place your parallels in the vise against the jaws. Take the Parallel Keeper, squeeze it together and place it inside the parallels. Release the Parallel Keeper, it will push against the parallels, holding them against the jaws of the vise. It's that simple! KPS-6000 model opens to 6" and has an overall size of 8" x 14". KPS-8000 model opens to 8" and has an overall size of 10" x 14". Your new revolutionary labor saver, your "machinists third hand," is at work, saving part change time. 1 lb. shipping weight.

Shown with 3610V

ArmLock® Handle AL6

ArmLock adjustable lever length handle is designed to allow spinning of the vise screw with the lever in the central position for fast jaw movement and light work clamping. Comfortable higher torque clamping is possible with the lever in the #2 position. By adding a hex extension, the handle can be used on 4" or 8" vises. The 3/4" hex portion of the AL6 has a set screw to prevent accidental removal. 2 lbs.

Kurt Speed Handle

The Kurt Speed handles reduce set-up and clamp times. The handles come in two sizes. The **D40SH** with its **9/16** (3lbs.) internal hex fit our 4 inch vises. The **D60SH** with a **3/4** (4lbs) internal hex will fit all our 6 inch model vises. Our handles do not interfere with the milling machine giving you rapid part loading and unloading. You get Kurt's quality in a custom steel designed product. There is no aluminum hex to strip. If you add one of our **Hex Extensions** you can use it on our 8 inch vises as well. **D40SH**. 3 lbs. **D60SH**. 4 lbs.

Kurt Torque Handle TH6

Torque Vs. Position				
Position	1	2	3	4
Torque Ft. Lbs.	6	8	10	20

Torque Tolerance ± 2 Lbs.

The Kurt Torque Handle provides repeatable clamping for small delicate parts. The Torque Handle gives you a precise feel while providing an audible "click". The small 10-3/4" overall length will not interfere with most table set-ups and the steel construction will give you the versatility and reliability demanded by today's modern machine shops. A set screw allows your Torque Handle to become an integral part of your vise and by adding a hex extension you can use it on 4" and 8" vises. 3.5 lbs.

Replacement Vise Handles

Kurt original equipment handles are solid cast iron for strength and durability and are plated for rust protection. The handle portion is one-piece with a machined ergonomic ball on the end.

Part #	Hex	Length
D40I-10-SA	9/16	6 in.
D60I-10-SA	3/4	8-5/8 in.
D80-10A-SA	7/8	16-1/8 in.
D100-10A-SA	1	16-1/8 in.

Vise Screw Hex Extensions

Features:

- Vise screw hex extensions become useful when the vises are mounted on large machines where extending the hex will allow better access.
- Hex extensions will allow a 6" handle to be used on a 4" or 8" Kurt vise.

VISE SCREW HEX EXTENSION								
Vise Size	Handle Size	Part #	Dim "A"	Dim "B"	Dim "C"	Dim "D"	Dim "E"	Weight
4"	6	HEX4A6	3.500	1.750	1.000	0.563	0.750	.5 lb.
4"	4	HEX4	3.750	1.500	1.000	0.563	0.562	.5 lb.
6"	6	HEX6	5.000	2.000	1.250	0.750	0.750	1 lb.
8"	6	HEX8A6	4.500	2.500	1.375	0.875	0.750	1 lb.

Spanner Wrench

Model No. DL430-307-SA – 4"
Model No. DL640-307A-SA – 6"

Features:

- Adjust the preload on your Kurt DoubleLock vise simply and quickly
- All Aluminum
- Knurled end for better grip
- Two models available: 4" and 6"

Swivel Base

Swivel base allows positioning in 1 degree increments.

KHP5000 Hydraulic Pump

- 1 HP Motor, 115/208-230 VAC
- Max Amps 11.1 @ 5000 PSI
- External safety relief is user adjustable from 500-5000 PSI
- Internal safety relief set at 5000 PSI
- Auto dump valve
- 127 cu. In. (.54 gal) total capacity
- 75 cu. In. (.32 gal) useable capacity
- Weight 82 lbs
- Average Pump Output Volume 31.3 cu. In.

Hydraulic Clamping Systems

For complete details see us online or request a copy of our Hydraulic Clamping Systems catalog.

Model: KHP5000PF

The Kurt hydraulic pump is a compact, lightweight portable pump and is the answer to your hydraulic pump needs when you must keep your clamp under constant hydraulic pressure. The Kurt hydraulic pump is driven by a high efficiency pneumatic motor and operated with a convenient, easy to use foot pedal. It will maintain constant pressure as long as the foot pedal is depressed regardless of system pressure, ensuring accurate and reliable clamping pressure each and every time.

The Kurt hydraulic pump is manufactured to ISO 9001:2008 standards through an international quality assurance program which involves consistent observation of administration, management, manufacturing, and production control. This results in a reliable high quality product that you can depend on.

- For single acting systems only
- Can be used with all Kurt single acting vises
- Internal load limiting valve protects against an overload
- Air exhaust muffler for quiet operation
- Aluminum reservoir
- Features both air and oil filters to reduce the risk of damage from environmental contaminants

Hydraulic hose (sold separately) designed exclusively for Kurt Hydraulic pump

**Automatic
Drawbar**

**Mechanical
Drawbar**

Available for most manual & CNC mills with standard R-8 collets or 30 or 40 taper tool holders. Automate your present "Knee-Type" milling machines by installing a Kurt PowerLock Drawbar. PowerLock Drawbars reduce tool change time and allow more cutting time in the cycle. This eliminates waste. The whole process using the Kurt automatic or mechanical PowerLock Drawbar cuts the tool change time to one-fourth the time required to change tools manually with wrenches. An added benefit is consistent torque on the drawbar rod. When you multiply the time savings for every tool change on all of your mills, it can really add up.

Features:

- Easy installation - operator can install with no special tools (instructions provided).
- Reduces operator fatigue - improves productivity and safety.
- Eliminates drawbar tapping to free tool in collet - reduces operator abuse.
- Convenient control - eliminates operator stretching to reach the drawbar.
- Assures uniform collet tightening - prevents under tightening and tool slip or over tightening and drawbar breakage.
- Operates on shop air supply - filter/lubricator, regulator and gauge included with most units. Provides clean oiled air to ensure long life.
- Safety interlock on automatic models prevents accidental engagement.
- Used with present tooling - operates R-8, #30 & #40 taper tool holders. Additional special tool holders not needed.
- Machine your own Drawbar Kits. Available for R-8 collets, #30 or #40 taper tool holders.

PowerLock Drawbar is available for these popular mills:

Acer	Lagun
Acramill	Mighty
Alliant	Millport
Bridgeport	Royal
Chevalier	Seiki
Clausing/Kondia	Sharp
Comet	Shizouka
DoAll	South Bend
Ex-Cell-O	Southwestern
Hurco	Supermax
Jet	Tri-Onics
Kent	Webb
Kondia	Willis

For manufacturers not listed, contact factory.

*Note: All machines that have Erickson Quick Change Spindle, and are converted to a Power Drawbar will have sharp threads and drive keys exposed near the spindle nose. We recommend the installation of a 194-00-SA Erickson Spindle Nose Guard.

Outside Micrometers

Features:

- Hardened, precision ground spindle.
- Carbide tipped measuring face for long life.
- Spindle lock secures the spindle at the desired reading.
- Insulated Handle.
- Quick and easy zero adjustment on sleeve (includes wrench).
- Fitted plastic case included.
- Ratchet thimble assures consistent measuring at all times, vernier scale with microfine graduations in 0.0001".

Model MC01 0-1" Specifications:

- Range: 0-1".
- Graduation: 0.0001".

Model MC12 1-2" Specifications:

- Range: 1-2".
- Graduation: 0.0001".

Additional Features:

- Calibration standard included.

Model MC23 2-3" Specifications:

- Range: 2-3".
- Graduation: 0.0001".

Additional Features:

- Calibration standard included.

Model MCD01 0-1" Mechanical Digital Specifications:

- Range: 0-1".
- Graduation: 0.0001".

Additional Features:

- Mechanical counter to simplify reading measurements, displays increments of 0.001".

Model EM01 0-1" Electronic Micrometer Specifications:

- Range: 0-1".
- Resolution: 0.0001".

Additional Features:

- Double Function key (Function: Metric-Inch Conversion).

Dial Calipers

Features:

- Body and Main Beam are stainless steel with satin chrome finish, microfine engraved graduations.
- White face dial with distinctive, large numerals, easy to read graduations in black; Fully adjustable for zero or intermediate settings with thumb screw to lock the precise settings.
- Covered screw-on rack prevents dirt accumulation in rack gear teeth.
- Raised bearing surface prevents wear and defacement of graduations.
- Thumb Roller is knurled for one hand operation and rapid setting and easy adjustment.
- Measuring Faces are hardened, precision ground & microlapped for ultimate accuracy during measuring process.
- Case included.

Model EC6 6" Electronic Caliper Specifications:

- Range: 0-6".
 - Resolution: 0.0001".
- ### Additional Features:
- Large and clear LCD readout.
 - Inch-Metric conversion.
 - Zero-setting at any position.

Model DC6 6" Dial Caliper Specifications:

- Range: 0-6", 0.100"/Rev.
 - Graduation: 0.001".
- ### Additional Features:
- 4-way measurements: outside, inside, depth, step.
 - Depth of outside jaws: 1.57".

Model DC8 8" Dial Caliper Specifications:

- Range: 0-8", 0.100"/Rev.
 - Graduation: 0.001".
- ### Additional Features:
- 4-way measurements: outside, inside, depth, step.
 - Depth of outside jaws is 1.89".

Model DC12 12" Dial Caliper Specifications:

- Range: 0-12", 0.100"/Rev.
 - Graduation: 0.001".
- ### Additional Features:
- 4-way measurements: outside, inside, depth, step.
 - Depth of outside jaws: 2.44".

Precision Measuring Sets

Model KDMS1 3 Piece Set Includes:

- Dial Caliper: 6"/0.001".
- Outside Micrometer: 0-1"/0.0001".
- Rule: 6"/4R.
- Plastic fitted case included.

Model KMD1 Magnetic Base + Dial Indicator Set Includes:

- Magnetic Base with fine adjustment (MBF1).
- Dial Indicator 0-1"/0.001" (D1).
- Plastic fitted case included.

Standard and Custom Gaging Solutions for automotive, medical, aerospace, and other manufacturing applications.

Test Indicators

Model DT3
0.03" Test Indicator
Specifications:

- Range: 0.03".
- Graduation: 0.0005".
- Dial Reading: 0-15-0.

Features:

- Rotating Bezel and large diameter white dial face with distinctive, easy to read graduations sets to zero anywhere on the dial.
- Jeweled Bearings provide low friction, high wear resistance, and maximum sensitivity.
- Three dovetail mounts

Model DT8
0.008" Test Indicator
Specifications:

- Range: 0.008".
- Graduation: 0.0001".
- Dial Reading: 0-40-0.

- for attaching to indicator holders and stands.
- Two dovetail mounting clamps with mounting stem diameter 5/32" and 3/8".
- Contact Point adjustable to 210° with auto-reverse, 0.078" dia. x 1/2" L.
- Fitted plastic case included.

Dial Indicators

Model D05
0.5" Dial Indicator
Specifications:

- Range: 0-0.5".
- Graduation: 0.001".
- Dial Reading: 0-100.

Features:

- AGD Group 2, meets AGD specifications.
- Dial rotates with white face for easy to read graduations in black for continuous readings and red for balanced readings.
- Contact Point is interchangeable hardened stainless steel with 4-48NF thread.
- Lug-back positioned through 90° increments with a 1/4" diameter hole for mounting to

Model D1
1" Dial Indicator
Specifications:

- Range: 0-1".
- Graduation: 0.001".
- Dial Reading: 0-100.

- indicator holders & stands.
- Stem is 3/8" diameter, hard chrome plated, precision ground and lapped, for mounting to holders.
- Bezel is easily adjusted thru 360°, with bezel clamp to lock the precise settings.
- Tolerance Pointers: adjustable, mounted on bezel.
- Fitted foam case included for storage.

Model D2
2" Dial Indicator
Specifications:

- Range: 0-2".
- Graduation: 0.001".
- Accuracy: ±0.003".
- Dial Reading: 0-100.

Electronic Dial Indicators

Model ED05
0-0.5" Electronic Dial Indicator
Specifications:

- Resolution: 0.0005".

Features:

- Large LCD display with 12.5mm characters' height.
- Large "click" function buttons for easy operation.

Model ED1
0-1" Electronic Dial Indicator
Specifications:

- Resolution: 0.0005".

- Power supplied with one SR44 battery whose capacity is 165mAh.
- Power on/off, zerosetting and Metric/Inch system conversion at any position with data output interference.

Magnetic Base

Model MBF1 Magnetic Base w/Fine Adjustment
Specifications:

- Power: 130 lbs. pull.
- Base Dimensions: 2.5" L x 2" W x 2.19" H.
- Upright Post: 15/32" dia. x 7" L.
- Indicator Holding Rod: 25/64" dia. x 6" L.

Features:

- Accepts all AGD dial indicators.
- Easy tune fine adjustment.
- V-base for placing on round surfaces.
- Smooth and easy on/off switch.
- Chrome plated rods & column.
- Foam case included for storage.

Height Gages

Model HGD6 6" Height Gage w/Single Column
Specifications:

- Range: 0-6".
- Graduations: 0.001".

Features:

- White dial face with distinctive, easy to read graduations in black, fully adjustable for zero or intermediate setting with thumb screw to lock the dial for precise settings.
- Column is hardened stainless steel with satin chrome finish for wear resistance, microfine engraved graduations.
- Scriber with carbide tipped and clamp included.
- Fine tuning adjustment and lock screw.
- Fitted wooden case included.

Model HGDC12 12" Height Gage w/Digital Counter
Specifications:

- Range: 0-12".
- Graduations: 0.001".

Features:

- Indicator & Counter: a large white dial indicator with 0.001" graduations and a dual-directional error-proof mechanical digital counter can be set to zero at any position. The counter has two displays with 0.1" increments, one counts up, the other counts down.
- Dual chrome plated beams.
- Bottom surface of the base is hardened, ground and lapped for maximum flatness.
- Scriber with carbide tipped with clamp.
- Large feed wheel moves slider and switches from coarse to fine adjustment.
- Fitted foam case included for storage.

Micrometer Sets

Model MC03
0-3" Outside Micrometer Set

Includes:

- 3 Piece Set.
- Fitted plastic case included.

Specifications:

- Range: 0-1", 1-2", 2-3".

Features:

- Hardened, precision ground spindle.
- Carbide tipped for a long life.
- 2 calibration standards.

- Spindle lock secures the spindle at the desired reading.
- Ratchet thimble with satin chrome assures consistent measuring at all times, vernier scale with microfine graduations in 0.0001".
- Quick and easy zero adjustment on sleeve (wrench included).

Model MC06
0-6" Outside Micrometer Set

Specifications:

- 6 Piece Set.
- Range: 0-1", 1-2", 2-3", 3-4", 4-5", 5-6".
- Graduation: 0.0001".

Features:

- Hardened, precision ground spindle.
- Carbide tipped for a long life.
- Spindle lock secures the spindle at the desired reading.
- 5 calibration standards.

- Quick and easy zero adjustment on sleeve (wrench included).
- Ratchet thimble with satin chrome assures consistent measuring at all times, vernier scale with microfine graduations in 0.0001".
- Fitted wooden case included.

Model MCDP62
0-6" Depth Micrometer Set

Includes:

- 7 Piece Set.
- Fitted plastic case included.

Specifications:

- Range: 0-6".
- Graduation: 0.001".
- Accuracy: ±0.0002".

Features:

- 2-1/2" length; Hardened, precision ground and microlapped base.
- Quick and easy zero adjustment on sleeve (wrench included).

- Ratchet thimble with satin chrome assures consistent measuring at all times.
- Six high accuracy interchangeable rods with 1" increments in length are fitted to the spindle against a positive stop and locked. Flat measuring surfaces are hardened, ground and lapped with .176" in diameter.
