Marley Industrial Products drum fans are specifically designed for industrial applications where quality, performance, and durability are required. The high performance motor, belt drive system, and specialized fan blade design combine to maximize airflow and velocity while reducing fan noise. Quality features include a sturdy steel housing, heavy duty painted wire guards, sturdy fan and motor supports, large rubber wheels with integrated bearings and a wide stable base.

The easy to roll tilt carts are powder-paint coated for durability and made of 1" diameter heavy gauge steel tubing reinforced with welded cross braces creating a stable platform. This allows the fan to be tilted at any angle to direct the airflow where needed without tipping over.

## LEADING EDGE INDUSTRIAL CEILING FANS

As Low As  
**\$251**

- Engineered and designed for spacious applications where maximum area coverage is required.
- Designed for both winter heat destratification and summertime cooling.
- Designed for general applications for above average area coverage and cooling velocity. Ideally suited for factories, gymnasiums, high bay storage facilities.
- Powerful, heavy-duty motor for mounting heights to 45 feet.
