

NOVAMET® - High Performance Coolant

PRODUCTS

NOVAMET® 900

- High-end cooling lubricant providing the highest power by special additives
- Chlorine Free, Boron Free Advanced European Technology
- Excellent flushing properties for clean machines and work piece
- Outstanding run-off characteristic for low consumption
- Compatible with all metals

NOVAMET® 872

- High-end cooling lubricant providing the highest power by special additives
- Chlorine Free Advanced European Technology
- Optimized all ferrous and aluminum alloys
- Strong ferrous corrosion protection
- Formulated for CGI compatibility

NOVAMET® 100

- Soft water focused technology
- Chlorine Free Advanced European Technology
- Excellent flushing properties for clean machines and work pieces
- Outstanding run-off characteristics for low consumption
- Extremely robust for long sump life
- Compatible with all metals

The **NOVAMET®** products are specialized products for high-demand machining processes such as deep drilling, high performance grinding, and yellow metal machining. With their unique formulation, these products provide the highest power and material compatibility.

All NOVAMET® products are water-miscible cooling lubricants composed of high quality mineral based oils. Through the use of state-of-the-art ingredients, these products are exceptional in terms of high performance, long lasting stability, and overall cost-efficiency.

NOVAMET® - The specialist among the Coolants
